Dear Gov. Lingle:

Please sign into law HB 2675, which would create a medical marijuana task force to examine ongoing issues regarding growing facilities, adequate supply, and the inter-island transport of medical marijuana.

Below are several reasons why you should approve this legislation:

- Hawaii already has a medical marijuana law – a study of that law would not conflict with federal law.
- The new law would address issues that, if not addressed now, will continue to persist.
- The new law would help legislators make informed decisions.
- The new law would not be permanent – it would expire in one year.
- Other states are currently addressing these issues – it would be remiss for Hawaii not to do the same.

Sincerely,
