New Hampshire Cannabis Policy Voter Guide

November 5, 2024, General Election

This year's elections will be key to whether New Hampshire finally lives up to its "Live Free or Die" motto. In the governor's race, legalization supporter Joyce Craig and prohibitionist candidate Kelly Ayotte are squaring off in a race ranked as a "toss up" by Cook Political Report. Meanwhile, the state Senate race has several open and competitive seats that will be crucial to if — and how — New Hampshire legalizes cannabis.

To help inform voters, MPP has created this voting guide, where we ranked candidates' support for legalization and other further cannabis policy reforms from A+ to F. The voter guide includes information from their records, public comments, responses to Citizens Count's survey, and replies to our candidate survey.

You can find your New Hampshire state Senate and House district — along with everything else that will be on your ballot — [here](#). You can also find information on how and where to vote from the [N.H. Secretary of State website](#).

Governor: Legalization Supporter vs. Prohibitionist

Joyce Craig (D) — A— Former Manchester Mayor Joyce Craig's [Issues page](#) says she supports legalization in a way that protects medical cannabis and encourages small businesses. In response to questions from MPP, her campaign said she also supports creating a commission to review possible annulment and expungement of past cannabis charges, and that she is open to limited home cultivation as part of adult-use legalization. ("Joyce is open to limited homegrow for adult-use as part of legalization.") — JoyceCraig.org

Kelly Ayotte (R) — F — The former U.S. senator and state AG opposes legalization. She worked to defeat medical cannabis and decriminalization. When WMUR asked Ayotte in 2024 if she would entertain legalization if she is elected governor, or if she is a firm "no," she [said](#), "I don't think legalizing marijuana is the right direction for our state. I don't support legalizing marijuana in this state."

In 2015, then-U.S. Sen. Ayotte lobbied NH state senators against modest decriminalization, [according to](#) prohibitionist Sen. Bill Gannon. Ayotte also opposed a tightly-crafted medical cannabis bill in 2009.

Ayotte's campaign failed to answer questions from MPP about whether she would veto a legalization bill, along with questions about her position on record-clearing and allowing home cultivation for patients or adult-use consumers. — KellyForNH.com

State Senate Candidates

In addition to compiling their records and public statements, we asked N.H. Senate candidates these four questions:

- 1) Twenty-four states and Canada have legalized cannabis for adults 21 and older. Do you support making it legal for adults 21 and older to use, possess, and purchase cannabis in New Hampshire?
- 2) As part of legalization in New Hampshire, do you support prioritizing and integrating the therapeutic cannabis program, including by allowing alternative treatment centers (ATCs) to convert to also sell to adult-use consumers if they meet requirements and by allowing all adult-use stores to sell to patients tax-free if they meet requirements?
- 3) Criminal records make it difficult to get a job, housing, and to otherwise achieve one's dreams. Many states are removing prior cannabis convictions from records to avoid ruining lives over a substance that is safer than alcohol. Do you support creating a state-initiated process to annul cannabis-related records?
- 4) All of New Hampshire's neighboring states allow adults 21 and older to discreetly and securely cultivate their own limited supply of cannabis for personal use. Do you support allowing adults to grow their own cannabis for personal use in New Hampshire?

Every Senate seat is on the ballot. For each race, we listed the more supportive candidate first.

Senate District 1 — Parts of Coos and Grafton Counties — Open Seat

With legalization, they should be everywhere cannabis is sold." In response to the 2024 Citizens Count Issue Survey's three legalization questions, Dr. Marsh said he supports cannabis legalization with state-run stores, with private retail locations, and with home cultivation and no sales. John McIntyre (R) — D- — In response to the 2022 Citizens Count Issue Survey's three questions on legalization, McIntyre said, "I am in favor of decriminalization without legalization of retail. I am concerned about monied, out-of-state interests swooping in and dominating the industry. NH cultivators/store owners should be empowered and well-positioned within their own territory. There is room for discussion on this, but ultimately I want locals to prosper." Green told the 2024 Citizens Count Issue Survey he is for legalization with state-run stores and legalization with home cultivation but no sales. Said he was “undecided” on legalization with private sales. Also commented, "Keeping it illegal at this point is just continued, willful rejection of the lessons we learned during prohibition in the 1920s. Let's fully legalize and regulate it the way we do alcohol,

which is arguably more damaging to society (and the individual). Cannabis is already out there, it's a personal freedom issue, and it's a revenue stream waiting to be tapped. We have the benefit of other state legalization experiences, and we can learn how to do this more effectively." —

I hear about high prices for food, gas, and home heating; I hear about troubling school performance; I hear about homelessness; I hear about crime. But, in truth, I hear nothing about legalizing pot. If I am elected and if such a bill comes before the State Senate, I would
