

## **Vermont Survey Results**

Q1 Seven states — including Massachusetts and Maine — and Washington, D.C. have passed laws allowing adults 21 and older to use, possess, and grow small amounts of marijuana for personal use. A Vermont bill would allow adults to use marijuana and to grow up to two mature marijuana plants in a secure location at home, similar to the way adults may brew their own beer. Do you support or oppose allowing adults who are 21 or older to use, possess, and securely grow a limited amount of marijuana?
